SURVEY DESIGN · LAUNCH AT THE ARTICLE 6 SUMMIT, BONN, JUNE 2027

Article 6 Network Global Survey 2027

The first global survey of both sides of the Paris Agreement carbon market: what host countries can supply, and what buyers will buy.

SUPPLY · HOST COUNTRIES DEMAND · BUYERS MATCHED · FIRST TRADES

ARTICLE 6 NETWORK ASSOCIATION · IMPACT HUB, RUE FENDT 1, 1201 GENEVA, SWITZERLAND

article6.net

PURPOSE

Policy and finance should follow evidence

Article 6 has many announcements and few public numbers on what countries can actually supply and what buyers will actually buy. The Global Survey asks both sides directly, every year, and publishes the aggregated answers.

Supply survey

The Article 6 authorities (DNAs) of host countries: readiness, pipeline, volumes, sectors, prices and capacity needs.

Demand survey

Sovereign buyers, SBTi-validated companies, airlines and investors: volumes, prices, preferred credits, claims and barriers.

METHOD

ITEM	APPROACH
Population	All Article 6 authorities on the UNFCCC list (130 Parties); sovereign buyers; companies with SBTi-validated targets (12,092); CORSIA airlines; investors and funds
Format	Online questionnaire of 20 questions, about 25 minutes, in Arabic, Chinese, English, French, Spanish and Ukrainian, with follow-up interviews
Fieldwork	January to May 2027
Confidentiality	Answers are confidential; only aggregated results are published; no country or company is named without consent
Results	Presented first at the Article 6 Summit, Bonn, June 2027; built into The State of the Article 6 Carbon Market 2027 at COP32

Results first for respondents

Every respondent receives the full results before publication.

SUPPLY SURVEY · HOST GOVERNMENTS AND DNAS

What can countries supply?

1. Does your country have an Article 6 authority, and since when?
2. Which mechanisms do you intend to use: Article 6.2, Article 6.4 (PACM), Article 6.8?
3. Has your country adopted an authorisation framework and a template letter of authorisation?
4. How many activities have you authorised, or expect to authorise, by 2030?
5. What volume of mitigation outcomes do you expect to authorise for transfer, 2026–2030 ($MtCO_2e$)?
6. What share of mitigation outcomes will you keep towards your own NDC?
7. Which sectors will supply them (energy, transport, forests, cookstoves, waste, industry, removals)?
8. Does your country hold verified REDD+ results that could become ITMOs (Art. 5.2 to 6.2)?
9. Do you plan to sell sovereign or programme-level ITMOs directly, government to government?
10. Which buyers are you negotiating with, or would you prefer (governments, CORSIA, companies)?
11. What price range do you consider fair for an authorised, adjusted tonne?
12. How will you use the revenues (budget, NDC investment, debt service, share of proceeds)?
13. Do you have a registry, and how will you apply corresponding adjustments?
14. Would you find an Article 6 Academy useful, and would you participate?
15. What are your main barriers to the first transfer?
16. Which capacity-building support would help most (legal, MRV, registry, pricing, finance)?
17. Would pre-finance, ITMO funds or guarantees help you bring supply to market faster?
18. How do you ensure environmental integrity and sustainable development benefits?
19. How many people work on Article 6 in your authority, and how many do you need?
20. Would you take part in the Article 6 Summit in Bonn in June 2027?

Draft questions, to be tested with DNAs before fieldwork. Answer formats: multiple choice, ranges and short text.

DEMAND SURVEY · BUYERS AND INVESTORS

What will buyers buy?

1. Which type of buyer are you (government, company, airline, investor, fund, intermediary)?
2. Do you plan to buy Article 6 units, and why (NDC, CORSIA, compliance scheme, voluntary claim, investment)?
3. What volume do you intend to buy, 2026–2030 (tCO_2e a year)?
4. Have you already bought or contracted Article 6 units, and how many?
5. Which units do you prefer: ITMOs under 6.2, A6.4ERs under the PACM, mitigation contribution units?
6. Do you require authorisation and corresponding adjustment?
7. Which project types and regions do you prefer, and which do you exclude?
8. Do you prefer emission reductions, removals or a mix?
9. What price would you pay per tonne, and how do you expect it to move to 2030?
10. Would you pre-finance, sign offtakes or invest through a fund?
11. Which compliance schemes matter to you (CORSIA, Japan, Singapore, Korea, Switzerland, EU)?
12. Which claims do you intend to make with Article 6 units?
13. Do you use ratings or due diligence, and from whom?
14. Would you find an Article 6 Academy useful, and would you participate?
15. What are your main barriers to buying?
16. Would you join a buyers' club such as the Paris Agreement Buyers Club?
17. Which host countries are you in discussion with, or would you prefer?
18. Which contract types do you prefer (spot, forward, multi-year offtake, tender)?
19. Who approves Article 6 purchases in your organisation, and is a budget set?
20. Would you take part in the Article 6 Summit in Bonn in June 2027?

OUTPUTS

Global results

Supply and demand to 2030, prices, preferred units and barriers.

Regional views

Results by region and by buyer type.

Recommendations

For policy makers, buyers and the market infrastructure.

Partners and contact

The Network welcomes partners to distribute the survey; sponsorship packages are on the next page.
